ABOUT THIS BOOKLET

This booklet has been put together not so much for the specific information it contains regarding each family but more to illustrate the variety and amount of data I have thus far collected and possible connections I may be able to help people make concerning their ancestry.

It is hoped it will help to intrigue and encourage you or other "Iler's" to participate with me by providing additional data and making the "Compendium of Iler's" which I am compiling more nearly complete. In turn all information will be made available to you and other family members so all participants can benefit and get enjoyment from the information for their own benefit or future generations of "Iler's" and their descendants.

It is likely one or more ancestors, or descendants, of most "Iler's" can be found in the files I am building. In many cases only a few clues are necessary to help establish the family-line to which almost any Iler, or Iler descendant, is connected. It is often more difficult to establish connections in the late 1800's or early 1900's than to establish links with lines before the 1850' or even 1700's.

There are 30 Family Group Sheets contained herein but it would require thousands of such sheets to provide a true reference work (book) covering all lines and generations of "Iler's" and their descendants. The FGS's here are, with few exceptions, each for different family lines though undoubtedly some may have yet unrecognized inter-relationships between them which I hope can be clarified or established as more information becomes available.

The files from which this data has been extracted (on or about mid-Nov 1996) are forever being up-dated and contain record of over 36,500 people, just shy of 50,000 names. As an example of "names" a married woman commonly has at least two names. In early times several different spellings of a person's surname are often to be found. These are reasons why more names are to be found than people.

The records displayed here are not necessarily the complete information stored in my files regarding these people. The order of the data (family group records) herewith is generally in birth date sequence of the principal person in each family group. However because it has seemed desirable to keep selected family groups together birth date order is not maintained through out the booklet.

FAMILY GROUP "C"

Conrad immigrated with his family from Germany arriving at Philadelphia on Sept 11, 1729. He and his wife Anna Margaret are the progenitors of in excess of 10,000 known descendants. He and his son Jacob (34) obtained 200 acre grants of land in what is today York Co, PA west of the Susquehanna River near Hanover. Jacob and Samuel the heads of Family Groups "J" and "I" which follow are descendants of Conrad.

FAMILY GROUP "I"

==========

Samuel, a brother of Jacob (Family Group "J"), was also a great grandson of Conrad and was born on Grosse Ile in the Detroit River which today is a suburb of Detroit, MI. He first settled in Dayton, OH and subsequently moved to Hagerstown, IN. He and the "Iler"s" in his line initially spelled their names EILER. His son Benjamin (11669) changed the spelling of the family name to EILAR which his descendants have followed as well as some of his siblings and their descendants have done.

FAMILY GROUP "EAL+TO"

Adolph Eiler (24429) is the principal immigrant of this family having arrived at Philadelphia in 1743 from Germany. By the late 1750's he is known to have been in the western "valley" region of Virginia and it seems highly possible he was the progenitor of a considerable number of other people beside the EAL & TO families. The "VY", "VJ", and "VR" groups could very well be descendants but no concrete links have thus far been found and established.

FAMILY GROUP "MP"

Peter OHLER (30600) and William OHLER Sr (30612) are believed to be brothers though this has not been confirmed. Peter immigrated in 1730 and William in 1737. Initially they both settled near Conrad Euler (36) where they took-out warrants for land as Conrad's (36) neighbors. There is no known relationship to Conrad other than being fellow German countrymen.

FAMILY GROUP "MP2"

William is believed to have been a brother of Peter (30600) and like his brother lived near Conrad for several years following his arrival in 1737. He moved to the Shenandoah Valley area of Virginia and held substantial amounts of property. He probably had more than the 4 children shown here. He sold land to William Munger who ultimately moved to Essex County in Canada near Detroit.

FAMILY GROUP "S"

Little is known of George himself but it appears he settled in lower New Jersey east of Philadelphia. By some accounts Conrad (36) had a brother George and whether this was he is not clear but no such link is known. George did leave a will which was probated in 1756. He is known to have had many descendants but probably has many more than have been recognized thus far. He appears to have been a Moravian church member like many of Conrad's descendants.

FAMILY GROUP "UA"

The UA family had many prolific members. The name seems to have been spelled EYLER early on then subsequently it is more often found spelled EYLAR. Even so this later spelling does not seem to be consistent. There appear to be at least two sets of records concerning the family which are quite similar but not identical. Georg did not migrate to America. It appears his wife was probably a cousin.

FAMILY GROUP "UA0"

Joseph appears to be the primary progenitor of the "UA" family line in America however some of his siblings also migrated to this country. He appears to have been and unusual man. The least of which might have been the fact he was 5'5" and weighed 300 lbs.

FAMILY GROUP "W"

Jacob was the progenitor of many Iler descendants. Perhaps even more than are currently known. His ancestry is cloudy. He could be the son of several people one of whom might be Adolph Eiler (24429) or perhaps George Eiler (20359). Likewise the "H" & "NH" families are in all probability his descendants.

FAMILY GROUP "H"

Jacob reputedly had two brothers who were born in NC but it is unknown what the boundaries of NC were at the time thus it is not clear where in fact they were born by today's boundaries. It is highly probable Jacob is a descendant of someone in the "W" family group. For example he could be a son of John Iler (15588) about whom very little is known.

FAMILY GROUP "NH"

==========

It is believed Henry is a descendant in the "W" or "S" family or families. He settled in Atchison County in northwest Missouri circa 1840 which area became part of Fremont County, Iowa about 1850. A number of inconsistencies and uncertainties exist regarding his ancestry.

FAMILY GROUP "NF"

==========

There were numerous Philip "Iler's" in the Philadelphia area in the mid-1700's and there is some question as to whether the Philip recited here is the true progenitor of the NF family line. The children recorded as siblings appear to be siblings and succeeding generations are considered proper descendants.

It seems highly probable Daniel could be a descendant of Conrad (36) but this is certainly not a confirmed fact. He could be a brother of William (12558) the progenitor of the Y family group but this too is an educated guess not a known fact. They both married Wagner's.

FAMILY GROUP "LF0-1"

George Oyler is a descendant of Iler's who were residents of England presumably before the 1600's who changed the spelling of their surname to Oyler about the mid-1600's. He was one of the first members of this family who migrated to America. Initially these "English" families settled in Indiana.

FAMILY GROUP "Y"

While like many other individuals whose ancestors are unknown it is thought William may be a descendant of Conrad. He married a Waggoner as did Daniel (16799) of the NI family group and they both resided in the general area close to where numerous of Conrad's descendants resided in the late 1700's.

FAMILY GROUP "NK"

==========

John J Iler was presumably born the same day (3 Aug, 1792) as Johann Oyler a great grandson of Conrad's. Both these John's had parents named Jacob and Barbara but despite the coincidences they may not be one and the same person... yet they might be. They resided in the same general area as adults.

FAMILY GROUP "VY"

==========

William's wife's ancestry is well documented but his is not. There are possibilities he could be descended from Adolph (24429). Other indications suggest he could be a member of the W family group. His descendants were generally born in Georgia or other parts of the south.
